Profile

I have successfully completed my Bachelor of Science degree in Applied Mathematics and majored in subjects such as Applied Mathematics, Operational Research and Scientific Computing. I also completed subjects such as pure mathematics and computer science. I am quite competent in computer literacy. I am passionate about discovering and learning new things, and therefore always interested in finding out how things work as well as finding new ways of doing things. I am more of an introvert. I can work on my own, but also function well within a team, as I believe you can do and accomplish more together than on your own.
